The first part of the paper is devoted to a general discussion of the problem of the origin of life. It is shown that the problem is one of the most important and interesting in the history of science. The author discusses the various theories of the origin of life, and shows that the most probable one is the theory of spontaneous generation. This theory states that life originated from non-living matter, and that it has since developed into the various forms of life that we see today. The author also discusses the evidence for this theory, and shows that it is supported by a large amount of scientific data. The second part of the paper is devoted to a discussion of the evolution of life. It is shown that life has evolved from simple to complex forms, and that this evolution has been driven by the forces of natural selection. The author discusses the various theories of evolution, and shows that the most probable one is the theory of Darwin. This theory states that life has evolved from a common ancestor, and that the various forms of life that we see today are the result of natural selection acting on the variations of this ancestor. The author also discusses the evidence for this theory, and shows that it is supported by a large amount of scientific data.

The third part of the paper is devoted to a discussion of the future of life. It is shown that life is still evolving, and that it will continue to evolve in the future. The author discusses the various theories of the future of life, and shows that the most probable one is the theory of the emergence of a new form of life. This theory states that a new form of life will emerge from the current forms of life, and that it will be more complex and more intelligent than the forms of life that we see today. The author also discusses the evidence for this theory, and shows that it is supported by a large amount of scientific data. The fourth part of the paper is devoted to a discussion of the role of life in the universe. It is shown that life is a unique phenomenon, and that it has played a significant role in the history of the universe. The author discusses the various theories of the role of life in the universe, and shows that the most probable one is the theory of the emergence of life as a result of the forces of natural selection. This theory states that life emerged from non-living matter as a result of the forces of natural selection acting on the variations of this matter. The author also discusses the evidence for this theory, and shows that it is supported by a large amount of scientific data.

1768-July 15-The Church having understood that Henry Danson had heretofore walked disorderly, in that he fled from the Church he formerly belonged to, indebted to some of them, for money he borrowed of them: and having squandered away the most of it: but having some left, which he brought away with him: was admonished for not leaving what he had with his Creditors: And was now advised to return what he had to his Creditors: and to put himself in as good a way as he could to get them more: Where upon he immediately withdrew himself from the Church: together with our refusing him a letter of Recommendation. The Church having reconsidered their Act in receiving Henry Danson found it to be that which we could not maintain, in that he was received by us, having been a member of another Church, and now admonished by them: and for what it is, to us unknown: Wherefore we think it not according to Christian Carefulness shunning all Appearances of Evil. to a person in such standing. Upon which Consideration we Renounced our act in Receiving him: And left him, as one found him refering him to Settle Matters with the Church he left.

Sept. 15-The Church sent Letters of Admonition to John

Particular Notes

1774-Sept. 1st-It being the time of our monthly Church meeting the Diffuculty that had long subsisted in the Church in regards to Family Worship, was reconsidered and the following method was conceded to (viz) that the Church Covenant should be read and explained, and to know the Church has agreement there in: and in explaining the Covenant when we come to the last Clause which is that we promise to walk in all Holy Gospen Duties. It was explained to include giving to the poor in their Necessity and like wise the Reading of Gods word in our Families, as God in Providence should give us Opportunity, and the enstructing of our Children in the Precepts of God, and that it did enclude as a Duty that we should per form Vocal Prayer, Morning & Evening, in Our Families as God shall give us Opportunity, and when we come together at our Tables to receive the Bounty of God, that it should be received with vocal thanks giving to God: it was further observed, that these duties were to included in the Covenant, that to live in the neglect of them, would be, to live in the breach of our Covenant. The Covenant being thus explained the Church voted that they was well agreed therewith as being their own Sentiments. first Refer back to page 19.

1783 -Dec. - At a monthly Meeting at the house of Elder Waldo when the time was not taken up in other Business the Church thought proper and necessary to confer upon the Directions given in 18 Math, 15,16,17, concerning dealing with an offending Brother 1st Query whether that Direction was so binding upon us that the Neglect to admonish a brother, that we knew had sined would render us guilty.

The Answer was Unanomously, that the neglect there of would render a person guilty according to Lev-19,17.

2nd Query, whether that Direction required, or admits of a Brother bringing an Accusation to the Church, against a brother without Evidence to prove it.

Ans. It is not required nor can it be admitted of because we find it expressly forbidden in the word of God see Deut 19, 15.

3rd. Query Whether an Accusation of one brother against another Brought to the Church was to be admitted without his taking the first and second Steps of Labour, according to the Directions given in this Text.

Answer No.

4th. Query Whether a Brother has a right to discover the faults of another in any other way but in a way of Labour according to the Directions given in this Text.

Ans. Not to say any but to those in the Labour according to the Directions untill it is brought to the Church, and not then to any other but the Church: till the Church has come to a Result. See Lev. 19.16
